#### ABOUT THIS PUBLICATION

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

#### DATA NOTE

ABS statistical series are being impacted to varying degrees as a result of The New Tax System, introduced in Australia from 1 July 2000. The New Tax System includes the removal of Wholesale Sales Tax and the introduction of a Goods and Service Tax (GST), and as a result, a number of ABS data series will reflect significant immediate and subsequent impacts. In future issues, implications of The New Tax System on series will be footnoted at the bottom of tables. For more information please see the Notes section in relevant publications.

Due to the suspension of trend series data for retail turnover, tables 1, 2 and 9 show seasonally adjusted data. Trend series data for retail turnover will be reintroduced in the next edition of this publication. Table 17 now shows the 14th Series CPI which commenced in the September quarter 2000. For more information see Consumer Price Index, Australia (Cat. no. 6401.0).
